April 5, 2002

Commissioner:

Prior to examination of recently elected claims, please amend the Substitute Specification filed on April 20, 2001 for the above-identified application as follows:

In the Specification:

Please replace the paragraph beginning at page 1, line 12 with the following rewritten paragraph:

D' This invention relates to the generation, refraction and detection of high-frequency gravitational waves that can be modulated and utilized for communications, propulsion and for the purpose of testing new physical and astronomical theories, concepts, and conjectures. More particularly the invention relates to the generation of gravitational waves (GW) by the interaction of
